Footnotes:

- <sup>1</sup> This product is available for purchase through the [web](#).
- <sup>2</sup> Detailed project mapping (2 and 4 foot contour interval data) includes all elements that appear on project maps as well as FEMA floodplain, base flood elevation and soil data. Typical features captured are bridges, canals, culverts, contours and spot elevations, digital terrain model (DTM), lakes, rivers, railroads, structures, street detail and survey control data. Every mapping project does not necessarily capture each of these features. The data available will vary from project to project. Follow these [directions](#) for purchasing this data.
- <sup>3</sup> Additional copies of commissioned map plots are half price, as long as the original plot file is available. Plot files are generally kept for 3 months.
- <sup>4</sup> This is the price if a hard copy plotted map was also commissioned.
- <sup>5</sup> The DVD contains the following data in ESRI shape file format: GDACS points, township and range lines, section lines, canals, lakes, rivers, streams, cities, Maricopa County boundary, towns, airports, animal control, emergency care facilities, law enforcement, libraries, parks, Tonto National Forest, trails, wilderness, bike routes, bridges, interchanges, railroads, rest areas and street centerlines (no address range). The data covers Maricopa County only.
- <sup>6</sup> The current floodplain information contains all of the changes that have occurred since the last DFIRM update (September 30, 2005). The data provided will be the latest data available at the time of purchase. This is a one time sale and does not include any future updates. The purchase will include the following data in these three formats (ESRI e00, ESRI shape file and CAD DXF): base flood elevations, FIRM panel boundaries, FEMA approved floodplains, pending floodplains, township-range and section, profile baselines and cross sections.
- <sup>7</sup> Copies of original study hard copy maps, reports, HEC1 models, HEC2 models and HECRAS are also available. To obtain or inquire about this information, please see the [Flood Control District Library Catalog Search](#) (<http://www.fcd.maricopa.gov/Pub/pub.aspx>).
- <sup>8</sup> If you would like to purchase an entire catalog for any of the aerial photography, please email [Eric Feldman, GIS Analyst](mailto:emf@mail.maricopa.gov) (emf@mail.maricopa.gov) for a price quote and indicate which aerial photography catalog you are interested in.
