

# Ashbrook Wash Improvement Project

*Bayfield Drive to Del Cambre Avenue*

The Flood Control District of Maricopa County and the Town of Fountain Hills have partnered to make improvements to Ashbrook Wash between Bayfield Drive and Del Cambre Avenue.

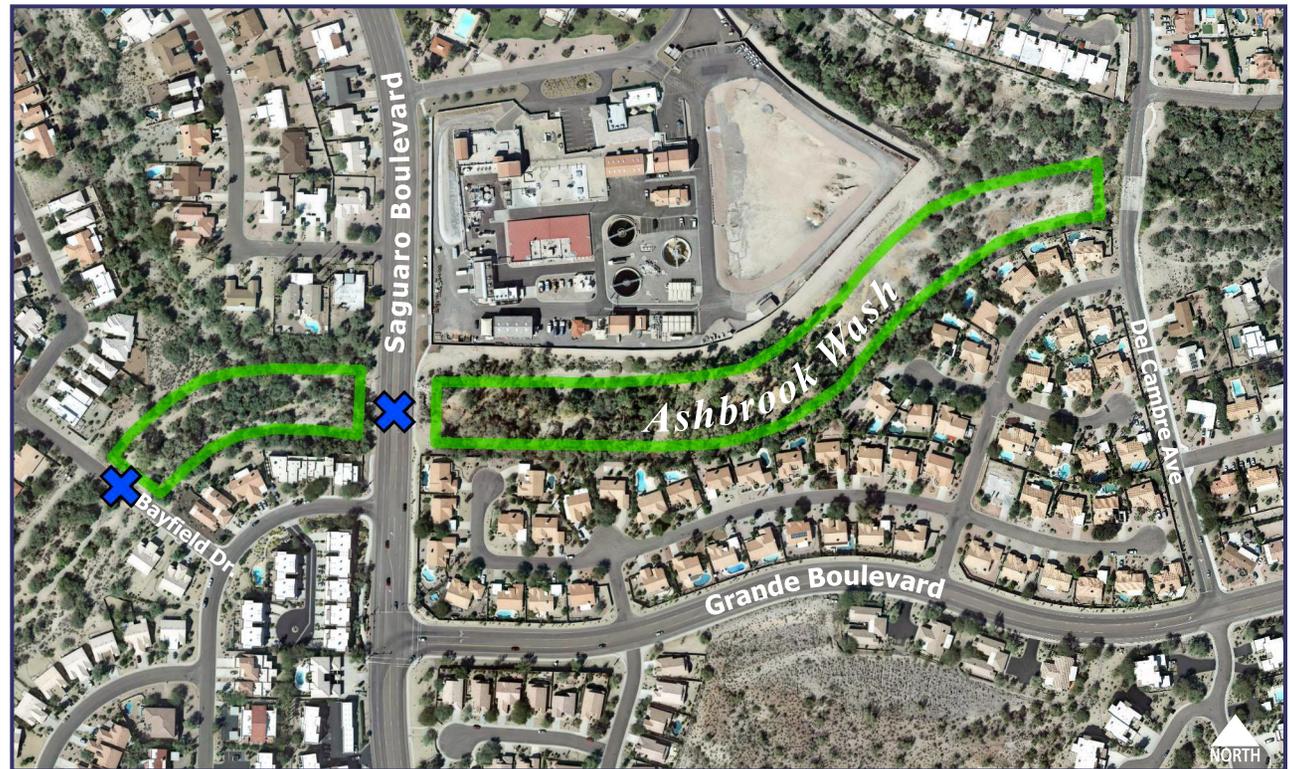

The Ashbrook Wash Improvement Project, which is currently in the design phase, is expected to include replacing two culvert crossings (at Bayfield Drive and Saguaro Boulevard), as well as cleaning and channelizing Ashbrook Wash as necessary to ensure it can safely convey flood flows.

Once completed, properties adjacent to Ashbrook Wash between Bayfield Drive and Del Cambre Avenue will be protected from flooding caused by 100-year flows through the wash, or flows that have a one percent chance of occurring in any given year.

The design and construction are being coordinated with the Town of Fountain Hill's Saguaro Boulevard Reconstruction Project.

## Timeline

The design phase of Ashbrook Wash Improvement Project is expected to be completed by fall 2014; construction could begin as early as 2015, depending on the availability of funding.

Map not to scale.

-  Cleaning and Channelization as Necessary
-  Culvert Replacement

## Construction & Traffic Impacts

When the construction phase begins, an effort will be made to minimize neighborhood inconvenience while allowing the contractor enough freedom to quickly complete the project. Anticipated restrictions will occur during the culvert replacements at Saguaro Boulevard and at Bayfield Drive. Saguaro Boulevard will be open during construction; however, it will be restricted to one lane in

each direction at Ashbrook Wash, allowing local traffic to continue at a reduced speed through the construction zone. Because Bayfield Drive is only one lane in each direction, Bayfield Drive will most likely be closed at Ashbrook Wash, with traffic rerouted onto other streets during the construction of that specific culvert.
