

Flood Control Dams

- **ALTERNATIVES SELECTION PROCESS**

- The project team generated a large list of possible rehabilitation or structural alternatives based on a “seed” list of potential types of alternatives.
- Using selection criteria developed, the project team pared the large list to 8 alternatives with one or more variations for some alternatives.
- Using updated selection criteria, the project team pared the list to the four alternatives discussed today.
- Final step will be to recommend a final alternative.

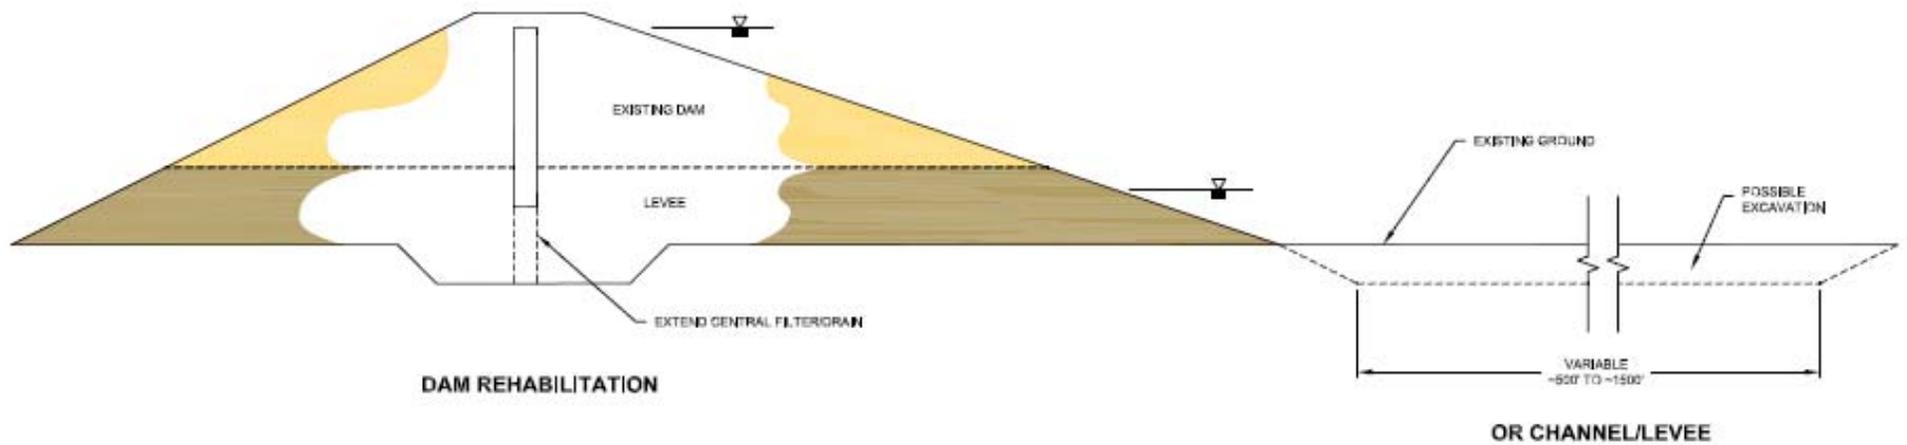

Flood Control Dams

- **SELECTION CRITERIA**

- Performance
- Risk
- Cost
- Time and Schedule
- Environmental Resources
- Scenery Resources
- Recreation and Open Space Resources
- Land Use
- Opportunities
