

Download the Clean Air App for iPhone, iPad, and Android

The Clean Air app provides you with real-time air quality information on your smartphone or tablet. With the summer season here, ground-level ozone is created when gasoline fumes, car exhaust, and other pollutants in our air react with intense summer heat and sunlight.

Download the app to get real-time information about air quality in Maricopa County and to find out when there are High Pollution Advisories.

Here are some tips you can follow if an Ozone High Pollution Advisory is issued:

- Avoid waiting in long drive-thru lines (eg. coffee shops, fast-food restaurants, or banks.) Park your car and walk inside.
- Fuel your vehicle after dark or during cooler evening hours.
- Find a carpool or vanpool. Visit Valley Metro at ShareTheRide.com or call 602-262-RIDE.
